CRES invites you to its October 2008 public meeting:

"Peak Oil: Genuine Problem or Just Another Liberal Scare?"

Thursday, October 23 / 5:30 PM

Jefferson Unitarian Church / 14350 W. 32nd Ave., Golden
(about 1 mile west of the 32nd Ave. & Youngfield St. exit from Interstate 70)

Also Available via FREE LIVE WEBCAST!

The subject of Peak Oil has been attracting increasing attention in the media as a major problem facing the human species. World oil production is currently peaking, or will be soon. Yet world demand continues to grow, especially in the China and India. How serious is this problem? Is it a real threat to our continued way of life? If it is, what can be done about it? How can energy efficiency and renewables play a role in reducing its impact? Or is the whole issue just another sky-is-falling tactic by liberals and environmental extremists in an attempt to make us curtail our enjoyment of the good life?

Expert panelists addressing these issues will include:

- **Steve Andrews**, independent energy consultant and Board member of the Association for the Study of Peak Oil-USA;
- **Morey Wolfson** from Governor Ritter's Energy Office, and also a board member of ASPO-USA;
- *And other experts (to be announced).*

FREE for CRES Members, and only \$5 for non-members.

The Colorado Renewable Energy Society (CRES) is a non-partisan, non-profit organization dedicated to increasing the awareness of the economic and environmental benefits of energy efficiency and renewable energy technologies. More information is available on the CRES website: www.cres-energy.org
