CRES invites you to its March 2009 public meeting:

"Financing Renewable Energy in Today's Capital Markets"

Thursday, March 26 / 7:00 PM

Available via FREE LIVE WEBCAST!

**Gay & Lesbian Fund Building, Training Room
315 E. Costilla St., Colorado Springs**

Finding the right financing for renewable energy projects has always been a challenge. Today's combination of tight financial markets and the need for more utility-scale RE projects, however, makes this challenge even more significant. Join us for a discussion by one of the leading experts in this field to see how projects like these get financed.

Lee White is an Executive Vice President and Manager for George K. Baum & Company at its Denver Public Finance Headquarters. He has been in investment banking for over 20 years and is responsible for underwriting over \$6 billion of municipal bonds. Mr. White has assisted numerous state & local governments and private corporations finance their infrastructure needs. The complete list of Mr. White's experience, accomplishments, and credentials is far too long for one paragraph; but highlights include serving as lead banker for several hundred million dollars' worth of renewable energy and other utility projects, Co-Chairman of the U.S. Congress Joint Economic Committee's Study on Infrastructure in the United States, member of the Colorado Clean Energy Development Authority, and participation in numerous airport, stadium, higher education, and non-profit projects. Mr. White has earned a Masters of Business Administration from Harvard Business School, a Masters of City Planning from the Massachusetts Institute of Technology, and a Bachelor of Science in Mechanical Engineering from Rensselaer Polytechnic Institute.

***Admission is FREE for CRES Members (Join CRES!)
Contributions of \$5 from Non-Members Appreciated***

The Colorado Renewable Energy Society (CRES) is a non-partisan, non-profit organization dedicated to increasing awareness of the economic and environmental benefits of energy efficiency and renewable energy technologies.

More information is available on the CRES website: www.cres-energy.org.
